Dear To Whom It May Concern:

I am writing to recommend the services of Karl Betke. Karl was the finishing carpenter on a home we recently built. He worked on many aspects of our home to make it a truly custom, personalized home, including (but not limited to) a) ceiling beams, b) built-in entry lockers, c) wood paneled ceiling and walls, and; d) custom bunk beds, closets and bathroom vanities.

I threw everything at Karl - including a 400lb kitchen sink! I am sure he thought I was crazy asking him to convert an old workbench and pine sideboard into a vanity or use some faded old barnwood for wainscoting; however, no ask was too big or out of the question. In addition, I was able to send Karl drawings or inspiration pictures and he would work with me to make sure we were on the same page before proceeding. His knowledge and attention to detail were exceptional and very much appreciated for our first custom home. He is not only thorough but also easy to work with and was always willing to take the time to discuss my concerns and respond to questions.

I feel confident in recommending Karl's services - in fact I already have! If you have any further questions, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "K Madsen". The signature is fluid and cursive.
